

Student photography contest

Theme - Plants and Animals

Plants and animals depend on our water resources for survival just as we do for our drinking water supply. The Etowah River supplies us with our drinking water and supports numerous plants and animals.

Photograph plants and animals near a lake, pond, reservoir or river - above the water or underwater. Look for deer, birds, turtles, fish or aquatic insects.

The photograph must be original and taken by the student.

Include the title of your photograph

Deadline - January 14th, 2022
