

## ***YOUR WATER METER WAS REPLACED TODAY***

*During your water meter replacement, water was temporarily interrupted. If easily accessible, we used an outdoor spigot to flush the service line after replacement. Flushing an outdoor spigot helps to remove any residual air or discolored water from water lines. We also recommend you flush your water line by opening the cold water side of inside tub or outside spigot for 1 minute or until water is clear.*

*Your meter was replaced for routine maintenance! Your water is safe to drink!*

*Cherokee County Water and Sewerage Authority has contracted M&E Construction, a licensed utility contractor, to perform this service.*

*If you have questions regarding your meter installation, please call M&E at (833) 626-3326.*

*If you have questions about the Meter Upgrade Initiative or billing, call CCWSA at (770) 479-1813.*
