

# Smart Leak Detection

## Device Program

**\$100 rebate**

This program is intended to provide assistance to customers that wish to monitor water usage information in their homes in order to respond to leaks more quickly and avoid costly water bills or property damage.

A smart leak detection device is a technology that enables a home's occupant to monitor and respond to water usage and/or leaks in real-time.

Three devices to be available for a \$100 rebate in the form of a credit placed on the customer's account for the 1st 50 customers through August 2024. Renewal of the program starting in September 2024.

Program ends August 2025.

Once the device has been chosen from the approved device list, a short application must be completed and submitted with 45 days of purchase. Once the billing department verifies the homeowner's address and reviews the account, a \$100 credit will be placed on the customer's account.

Downloadable application can be found at
